

Evaluation of Professional Development Session Proposals

Scoring Metrics

In the Grading Rubric, there are points for each of the session components. For each session, please provide numeric values that indicate the strength of the session proposal and the relevance to the SACNAS audience. The scores will range from the lowest (0) to the highest (4), where the highest score always represents that the proposal is very strong on those aspects, and where 0 represents that the proposal is lacking in those aspects.

Guiding Considerations: One of the fundamental aspects of the professional development sessions presented at SACNAS is diversity. The session's diversity components should include but not be limited to the following areas:

- 1. <u>Disciplinary diversity</u>: Are various disciplines overly represented or underrepresented in your highest scoring cohort?
- 2. <u>Demographic diversity</u>: Does the session speakers represent diversity in terms of racial and ethnic backgrounds?
- 3. <u>Institutional diversity</u>: Is there diversity of institutions represented in the session?
- 4. STRONGLY discourage solo speaker presentations. We would only allow single presenters if the presenter was the only viable subject matter expert for the session topic. This would need to be clearly justified and described in the application submission. Higher weight is given to multiple speakers due to the diversity aspect of having more than one perspective.
